

J-DAMPER

**Junttan
LIFE**

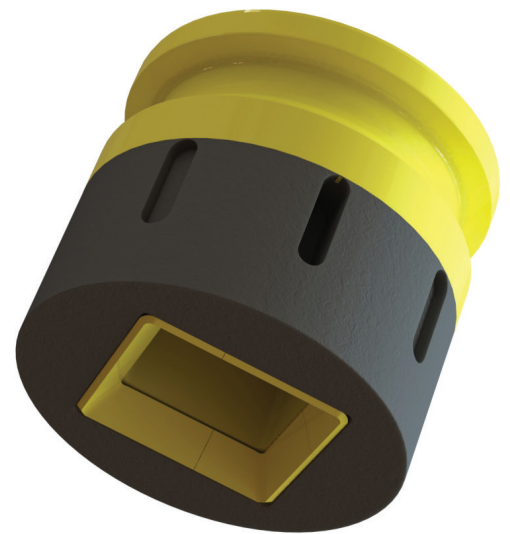

LESS NOISE, MORE PILES

Junttan J-Damper is a revolutionary noise reduction solution for Junttan drive caps. The special elastic material is molded around the drive cap's pile housing to prevent vibrations and noise during piling. By preventing the vibrations, also the lifetime of the drive cap metal structures is extended.

Drive caps equipped with J-Damper are available for all Junttan hammers.

BENEFITS

- UP TO 4 DB DAMPENING EFFECT
- EXTRA GUIDANCE FOR THE DRIVE CAP FOR OPTIMAL ENERGY TRANSFER
- LONG LASTING COMPOUND
- CAN BE REFURBISHED
- SUITABLE FOR HHK-A, HHK-S AND SHK-HAMMERS

MEASUREMENT, without noise dampening* noise level dB (A)

60sleq	92
Slow	94
Fast	98
Peak	116

MEASUREMENT, with noise dampening* noise level dB (A)

60sleq	89
Slow	90
Fast	95
Peak	112

* With SHK5 hammer and 300x300 precast concrete piles
