

INFORMATION IS THE KEY TO SUCCESS

The value of information is growing by the day, but in some cases information can be hard to reach. With Junttan Life Online and Junttan Remote Connection, you can access all of the vital data from one website. Rig operators and the service crew can access all the needed documentation and add maintenance events to the Junttan Digital Service history. Office personnel can preplan the worksites, monitor the status of the equipment remotely and after the piling, report the needed information easily.

INFORMATION IS THE KEY TO SUCCESS

- Easy access from one website
- Information is available 24/7/365 without any hold-ups
- Previously unseen data can now be monitored and analysed remotely on equipment with the Junttan Remote Connection
- Services are constantly developed and extended based on customer needs

EXAMPLES OF JUNTTRAN LIFE ONLINE SERVICES

- Junttan Piling Management Office (PMO)
 - › Planning and reporting of piling process
