

JunttanCare+ spare parts agreement

Do you want to make servicing your Junttan equipment smoother?

Getting the needed parts on time has never been easier.

- When is service needed?
- Who is tracking the hours?
- Who is ordering the parts and scheduling the service?

Leave these tasks up to JunttanCare+ to take over your scheduled maintenance.

With JunttanCare+, our crew will contact you 80 machine hours before your next scheduled maintenance. Once the required list of parts is determined, we will ship the service kit directly to your shop or job site.

Remote support and annual audits

JunttanCare+ comes with a remote connection so the rig will be always connected to the Junttan support center. Technical issues can be solved remotely and in some cases, under 1 hour. In addition, the JunttanCare+ agreement includes an annual audit of your equipment*. Junttan equipment audit includes an inspection for mechanical, hydraulic, electric and safety components.

As a result, Junttan will issue a complete condition report with recommended maintenance and spare parts to keep your equipment operational and safe.

* Audits and free shipping costs apply to Australia, Benelux, Germany, North America, and Scandinavia.

The Junttan service team
is always on call if you
need assistance.
