

NOISE SILENCER KIT

LIFE

LESS NOISE, MORE OPPORTUNITIES

The Junttan Noise Silencer Kit is our latest innovation in noise reduction for Junttan drive cap assemblies. Designed to significantly minimize noise levels, the kit includes a silenced drive cap housing, airborne noise silencer, and silenced drive cap. By utilizing advanced materials and engineering, it delivers a substantial noise reduction—far beyond existing solutions.

Now available for Junttan Shark and HHKS hammers with d800mm drive cap housing.

KEY BENEFITS

- Up to 12dB noise reduction
- Lower noise levels mean:
 - Easier access to noise-sensitive job sites
 - Enhanced operator comfort
 - Reduced disturbance for surrounding communities
- Compatible with standard drive caps (with slightly reduced silencing effect)
- Strengthens your company's environmental and brand reputation

MEASUREMENT, without Noise Silencer kit * noise level dB

Laeq ** Equivalent continuous sound level 101,2

MEASUREMENT, with Noise Silencer kit** noise level dB

Laeq ** Equivalent continuous sound level 87,1

**Measured using a SHK7 hammer with 350x350mm precast concrete piles and a drop height of approximately 60cm on a job site.*

***Laeq (A-weighted equivalent continuous sound level) represents the average sound level over a given period, adjusted for human hearing sensitivity.*
